- 1 from the Sagua de Tánamo municipality.

Santiago de Cuba (4 cases)

3 of the Santiago de Cuba municipality.

1 of the Songo La Maya municipality.

Guantánamo (4 cases)

2 of the Guantánamo municipality

San Antonio del Sur and Manuel Tames with 1 case each.

Details of confirmed cases:

Sagebrush

43-year-old Cuban citizen, resident in the Mariel municipality, Artemisa province. Contact of previously confirmed case. 10 contacts are kept under surveillance.

21-year-old Cuban citizen, resident in the Alquizar municipality, Artemisa province. Contact of previously confirmed case. 13 contacts are kept under surveillance.

Havana

29-year-old Cuban citizen, resident in the Centro Habana municipality, Havana province.

Contact of previously confirmed case. 9 contacts are kept under surveillance.

59-year-old Cuban citizen, resident in the Cerro municipality, Havana province. Contact of previously confirmed case. 8 contacts are kept under surveillance.

55-year-old Cuban citizen, resident in the Habana del Este municipality, Havana province. Contact of previously confirmed case. 8 contacts are kept under surveillance.

57-year-old Cuban citizen, resident in the Cotorro municipality, Havana province. Contact of previously confirmed case. 12 contacts are kept under surveillance.

17-year-old Cuban citizen, resident in La Lisa municipality, Havana province. Contact of previously confirmed case. 11 contacts are kept under surveillance.

41-year-old Cuban citizen, resident in the Diez de Octubre municipality, Havana province. Contact of previously confirmed case. 10 contacts are kept under surveillance.

70-year-old Cuban citizen, resident in the Diez de Octubre municipality, Havana province. Contact of previously confirmed case. 8 contacts are kept under surveillance.

46-year-old Cuban citizen, resident in the La Lisa municipality, Havana province. Contact of

previously confirmed case. 9 contacts are kept under surveillance.
57-year-old Cuban citizen, resident in the San Miguel del Padrón municipality, Havana province. Contact of previously confirmed cases. 17 contacts are kept under surveillance.
52-year-old Cuban citizen, resident in La Lisa municipality, Havana province. Contact of previously confirmed case. 8 contacts are kept under surveillance.
30-year-old Cuban citizen, resident in the Regla municipality, Havana province. Contact of previously confirmed case. 18 contacts are kept under surveillance.
58-year-old Cuban citizen, resident in the Boyeros municipality, Havana province. Contact of previously confirmed case. 7 contacts are kept under surveillance.
22-year-old Cuban citizen, resident in the Boyeros municipality, Havana province. Contact of previously confirmed case. 16 contacts are kept under surveillance.
46-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. Contact of previously confirmed case. 11 contacts are kept under surveillance.
13-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. Contact of previously confirmed case. 11 contacts are kept under surveillance.
22-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. Contact of previously confirmed case. 9 contacts are kept under surveillance.
22-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. Contact of previously confirmed case. 39 contacts are kept under surveillance.
7-year-old Cuban citizen, resident in the Diez de Octubre municipality, Havana province. Contact of previously confirmed case. 12 contacts are kept under surveillance.
9-year-old Cuban citizen, resident in the Diez de Octubre municipality, Havana province. Contact of previously confirmed case. 12 contacts are kept under surveillance.
42-year-old Cuban citizen, resident in the Habana del Este municipality, Havana province. Contact of previously confirmed case. 12 contacts are kept under surveillance.
60-year-old Cuban citizen, resident in the Playa municipality, Havana province. Contact of previously confirmed case. 17 contacts are kept under surveillance.
43-year-old Cuban citizen, resident in the Playa municipality, Havana province. Contact of previously confirmed case. 7 contacts are kept under surveillance.
30-year-old Cuban citizen, resident in the Marianao municipality, Havana province. Contact of previously confirmed case. 10 contacts are kept under surveillance.
55-year-old Cuban citizen, resident in the Marianao municipality, Havana province. Contact of previously confirmed case. 12 contacts are kept under surveillance.
38-year-old Cuban citizen, resident in the La Lisa municipality, Havana province. Contact of previously confirmed case. 11 contacts are kept under surveillance.
24-year-old Cuban citizen, resident in the La Lisa municipality, Havana province. Contact of previously confirmed case. 12 contacts are kept under surveillance.
18-year-old Cuban citizen, resident in the La Lisa municipality, Havana province. Contact of previously confirmed case. 12 contacts are kept under surveillance.
22-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. Contact of previously confirmed case. 10 contacts are kept under surveillance.
4-year-old Cuban citizen, resident in the municipality

46-year-old Cuban citizen, resident in the Niquero municipality, Granma province. Case with source of infection abroad. 182 contacts are kept under surveillance.
27-year-old Cuban citizen, resident in the Media Luna municipality, Granma province. Case with source of infection abroad. 182 contacts are kept under surveillance.

28-year-old Cuban citizen, resident in the Yara municipality, Granma province. Case with source of infection abroad. 182 contacts are kept under surveillance.

Holguin

38-year-old Cuban citizen, resident in the Sagua de Tánamo municipality, Holguín province. Case with source of infection abroad. 182 contacts are kept under surveillance.

Santiago de Cuba

48-year-old Cuban citizen, resident in the Santiago de Cuba municipality, province of the same name. Case with source of infection abroad. 182 contacts are kept under surveillance.

48-year-old Cuban citizen, resident in the Songo La Maya municipality, Santiago de Cuba province. Case with source of infection abroad. 182 contacts are kept under surveillance.

37-year-old Cuban citizen, resident in the Santiago de Cuba municipality, province of the same name. Case with source of infection abroad. 182 contacts are kept under surveillance.

37-year-old Cuban citizen, resident in the Santiago de Cuba municipality, province of the same name. Case with source of infection abroad. 182 contacts are kept under surveillance.

Guantanamo

43-year-old Cuban citizen, resident in the Guantánamo municipality, province of the same name. Case with source of infection abroad. 182 contacts are kept under surveillance.

43-year-old Cuban citizen, resident in the San Antonio del Sur municipality, Guantánamo province. Case with source of infection abroad. 182 contacts are kept under surveillance.

30-year-old Cuban citizen, resident in the Guantánamo municipality, province of the same name. Case with source of infection abroad. 182 contacts are kept under surveillance.

28-year-old Cuban citizen, resident in the Manuel Tames municipality, Guantánamo province. Case with source of infection abroad. 182 contacts are kept under surveillance.

Of the 3 thousand 866 patients diagnosed with the disease, 550, 527, 95.8% with stable clinical evolution remain confirmed. 92 deaths are reported (none in the day), two evacuated, 27 discharges of the day, 3 thousand 222 recovered patients accumulate. Five patients in critical condition and 18 in serious condition are reported.

Critically ill patients:

84-year-old Cuban citizen. It comes from the Marianao Municipality. Personal Pathological Background: Arterial Hypertension and Vascular Cell Carcinoma. He is hemodynamically unstable, blood gas with moderate hypoxemia. Chest X-ray with inflammatory lesions disseminated in both pulmonary fields predominantly on the left. Reported as unstable critic.

54-year-old Cuban citizen. It comes from the Municipality of Diez de Octubre. Personal Pathological Background: Chronic Lymphoid Leukemia (6 years). It is afebrile, with abundant bronchial secretions, less edematous and poorly distributed. A tracheostomy was performed yesterday without complications. Gasometry with respiratory acidosis. Chest X-ray with diffuse inflammatory mottling in both lung fields. Resolved right pneumothorax (right pleurotomy functioning). Reported unstable criticism.

94-year-old Cuban citizen. It comes from La Lisa Municipality. Personal Pathological Background: Ischemic Heart Disease. It is found with chest X-ray: left basal small atelectasis band. No inflammatory lesions or pleural effusion. Reported of stable criticism.

Cuban citizen, 65 years old, comes from La Lisa Municipality. Personal Pathological Background: Arterial hypertension and Chronic Obstructive Pulmonary Disease. She finds a tracheostomy without complications. Gasometry respiratory alkalosis with severe hypoxemia. Echocardiogram. Preserved biventricular systolic function, preserved global and segmental contractility, mild pericardial effusion. Chest X-ray. Radiological improvement. Inflammatory and interstitial lesions in both lung fields with bibasal predominance. Reported of stable criticism.

Cuban citizen, 52 years old. It comes from the San Cristóbal Municipality, Artemisa province. Personal Pathological Background: does not refer. It is found with inflammatory lesions

disseminated in both lung fields with a predominance of the bases. Reported as a stable critic.

Patients in serious condition:

87-year-old Cuban citizen. Personal Pathological Background: Diabetes Mellitus. Arterial Hypertension, Ischemic Heart Disease, Chronic Kidney Disease and severe protein-calorie malnutrition. He found a chest X-ray: no pleuro-pulmonary lesions. Reported serious.

Cuban citizen, 79 years old. It comes from the Marianao Municipality. Personal Pathological Background: Diabetes Mellitus. Arterial Hypertension, Bronchial Asthma and Hypothyroidism Found with bibasal inflammatory lesions. Reported serious.

Cuban citizen, 58 years old. It comes from the Habana del Este municipality. Personal Pathological Background: Diabetes Mellitus. Arterial Hypertension and Obesity He found a chest X-ray with radiological improvement. Inflammatory mottling up to the middle third of both lung fields. Reported serious.

Cuban citizen, 75 years old. It comes from the Habana del Este Municipality. Personal Pathological Background: Arterial Hypertension, Brain Vascular Disease (right residual hemiparesis) and Right hip fracture operated three months ago. It is found with multiple radiopaque lesions with a reticular pattern in both hemithorax with an inflammatory aspect that occupies up to the pulmonary apexes, predominantly on the right, with transparent lesions at the parahilar level. Reported serious.

Cuban citizen, 45 years old. It comes from La Lisa Municipality. Personal Pathological Background: Arterial Hypertension and Kidney Transplantation (7 years ago). It is found with global cardiomegaly, inflammatory-like lesions in both hemithorax, predominantly right, and no pleural effusion. Reported serious.

44-year-old Cuban citizen. It comes from La Lisa Municipality. It is found with radiopacity that occupies the lower 1/3 of the right hemithorax, with inflammatory lesions above it that occupies the right vertex. Do not spill plural. Reported serious.

Cuban citizen, 74 years old. From the Municipality of Marianao. Personal Pathological Background: Diabetes Mellitus. It is found with predominantly inflammatory lesions of the left hemithorax and right cardiophrenic. Reported serious.

Cuban citizen, 97 years old. It comes from the Cerro Municipality Personal Pathological Background: Arterial Hypertension, Diabetes Mellitus and Senile Dementia. She found lesions of inflammatory aspects at the level of the right base without pleural effusion. Reported serious.

76-year-old Cuban citizen. It comes from the Boyeros Municipality. Personal Pathological Background: Arterial Hypertension and Chronic Obstructive Pulmonary Disease. It is found with radiological worsening, inflammatory lesions in both pulmonary fields predominantly left. Reported serious.

Cuban citizen, 72 years old. It comes from the Centro Habana Municipality. Personal Pathological Background: Arterial Hypertension, Diabetes Mellitus and Ischemic Heart Disease. (Old Acute Myocardial Infarction). She is found with blood gas with mild hypoxemia. Chest X-ray: inflammatory lesions in both lung fields predominantly right baseline. Reported serious.

84-year-old Cuban citizen. It comes from the Centro Habana Municipality. Personal Pathological Background: Arterial Hypertension, Ischemic Heart Disease, Peripheral Arterial Insufficiency and Smoker. It is found with inflammatory-like lesions predominantly in the right hemithorax, not pleural effusion. Reported serious.

83-year-old Cuban citizen. It comes from the Municipality of Diez de Octubre. Personal

Pathological Background: Arterial Hypertension and Prostatic Hyperplasia. It is found with radiological worsening. Inflammatory lesions disseminated in both lung fields, not pleural effusion. Reported serious.

Cuban citizen, 65 years old. Personal Pathological Background: Diabetes Mellitus, old Brain Vascular Disease (stiff state with dysarthria). It is reported as serious.

78-year-old Cuban citizen. From Arroyo Naranjo Municipality. Personal Pathological Background: Chronic Obstructive Pulmonary Disease, Paranoid Schizophrenia, Heart Failure and Protein-Energy Malnutrition. It is found with inflammatory lesions in the middle third and right base. Reported serious.

56-year-old Cuban citizen. Coming from La Castellana Home, Arroyo Naranjo Municipality. Personal Pathological Background: Diabetes Mellitus, Chronic Kidney Disease, Down Syndrome and Protein-Energy Malnutrition. She is found on blood gas with mild metabolic acidosis. Chest X-ray: inflammatory lesions on the right base. Reported serious.

Cuban citizen, 79 years old. From the Guanabacoa Municipality. Personal Pathological Background: Ischemic Heart Disease. Aortic valve replacement surgery and coronary revascularization. She is afebrile. With preserved general condition, hemodynamically stable. Reported serious.

62-year-old Cuban citizen. Coming from the Sandino Municipality, of the Pinar del Río province. Personal Pathological History: Double Mitral and Aortic valve replacement surgery. Chest X-ray: no pleuropulmonary lesions. Reported serious.

Cuban citizen, 85 years old. It comes from the San Cristóbal Municipality. Artemisa province. Personal Pathological Background: Recurrent ischemic cerebrovascular disease, Two-month evolution of non-operated hip fracture, Grade II - III pressure ulcers. Met with metabolic alkalosis gasometry. Chest X-ray: inflammatory lesions on the right base with slight effusion. Reported from Grave.

Until August 27, 185 countries with COVID-19 cases are reported, the confirmed cases amount to 24 million 204 thousand 686 (+ 276 thousand 147) and 826 thousand 090 deaths (+ 6 thousand 334) for a fatality of 3.41 % (-0.01).

The Americas region reports 12 million 910 thousand 547 confirmed cases (+132 thousand 035), 53.33% of the total cases reported in the world, with 455 thousand 566 deaths (+ 3 thousand 953) for a fatality of 3 , 52 (-0.01).
